

Device Security & Digital Identity Protection

Digital Risk Management

Secure your Devices, Control your Digital Persona, and Protect your Assets

PROTECT YOUR IDENTITY

Protect your bank accounts, social media profiles, and assets from potential theft by hackers, scammers, and thieves.

DEVICE SECURITY

Lock your devices down from hackers, adversaries, and advertisers.

BEST PRACTICES

Learn how to browse the internet securely, identify risky websites, and control what information you passively emit during your everyday activities.

DIGITAL PERSONA

Control the privacy of your personal data and discover what information is already public. You may be surprised!

- Lock down your mobile devices, laptops, email, and online accounts from hackers and criminals
- Protect your Digital Identity from theft and hijacking
- Learn to identify attacks against your identity and stop them ahead of time

OVERVIEW

Being in control of your digital identity on the internet is the key to understanding how to identify and avoid malicious actors, hackers, scammers, and thieves. Our methodology of protection is based on self and system analysis in a threat-based environment and during everyday operations. Your digital identity never sleeps. We specialize in preventing incidents by countering the tactics, techniques, and procedures of malicious actors, such as social media targeting, account hijacking, identity theft, phishing campaigns, and ransomware.

Downrange Technologies' team of cyber security experts are pioneers in the field of *Digital Identity Protection* and *Digital Risk Management*. We harness our expertise to provide our clients with bespoke digital strategies to enhance their security before, during, and after a hostile or malicious event.

Our service offering includes cyber security services and training, including penetration testing, mitigation recommendations, operational security analysis, network vulnerability management programs, and mobile device hardening for everyday use and international travel. We also offer persistent and digital profile management to ensure our customer's business and personal reputations stay intact.

WHY CHOOSE DOWNRANGE?

- ✓ **TECHNICAL SUPERIORITY:** Every aspect of modern cyber security requires advanced technical expertise. With our expertise you will be able to adapt and succeed in the ever-changing digital environment.
- ✓ **TRUSTED EXPERIENCE:** Downrange Technologies is staffed and run by former Intelligence and Cyber Professionals with over 15 years of relevant and operational experience in technology and digital security.
- ✓ **COMPREHENSIVE SUPPORT:** We provide our customers with advanced support, resources, and training to Secure, Control, and Protect their digital identities and assets.
